

Professional Backup with Drobo and P4 Backup2Go

Drobo storage and P4 Software work hand in hand and make Backup really easy

Important data is increasingly created and edited on the road. Mobile workstations and freelancers have been a challenge for Backup since they are connected irregularly. P4 Backup2Go was developed with this in mind. No matter if at the hotel, at the customer or at home, the first Backup can run within minutes. With almost no setup Drobo is the ideal storage and immediately ready with BeyondRAID technology.

Backup takes place automatically and in the background. P4 Backup2Go uses enterprise level Backup technology. Easy configuration, overview and restore via browser make Backup really simple. Drobo is the storage that simply works. Now also for the whole company.

Drobo and P4 make backup simple and safe.
